2022

Legislation

New changes to MRLs pesticide residues

[EFSA Journal 2022;20\(1\):6992](#)

Modification of the existing maximum residue levels for fosetyl/phosphonic acid in chards/beet leaves and honey resulting from the use of potassium phosphonates.

Marketing authorisation for dried coffee berry pulp renewed

[EU Official Journal L 9 of 14 January 2022, p. 29](#)

Commission Implementing Regulation (EU) 2022/47 of 13 January 2022 authorising the placing on the market of dried berry pulp of *Coffea arabica* L. and/or *Coffea canephora* Pierre ex A.Froehner and its infusion as a traditional foodstuff from a third country under Regulation (EU) 2015/2283 of the European Parliament and of the Council and amending Commission Implementing Regulation (EU) 2017/2470.

MRLs for novaluron revised

[EFSA Journal 2022;20\(1\):7041](#)

Review of the existing m4.8 gram omega 3 per 100 gram claim bron van omega 3. aximum residue levels for novaluron according to Article 12 of Regulation (EC) No 396/2005.

MRLs of isoxaben revised, revision of six other MRLs not needed

[EFSA Journal 2022;20\(1\):7061](#)

Pesticide active substances that do not require a review of the existing maximum residue levels under Article 12 of Regulation (EC) No 396/2005

[EFSA Journal 2022;20\(1\):7062](#)

Review of the existing maximum residue levels for isoxaben according to Article 12 of Regulation (EC) No 396/2005.

Applications for renewal of number of active substances in plant protection products

[EU Official Journal L 16 of 25 January 2022, p. 1](#)

Commission Regulation (EU) 2022/93 of 20 January 2022 amending Annexes II, III and IV to Regulation (EC) no. 396/2005 of the European Parliament and of the Council as regards maximum residue levels for acrinathrin, fluvalinate, folpet, fosetyl, isofetamid, 'pepino mosaic virus, strain EU, weak isolate Abp1', 'pepino mosaic virus, strain CH2, weak isolate Abp2', spinetoram and spirotetramat in or on certain products.

EFSA sees safety concerns against dried flour because of cyclotides

[EFSA Journal 2022;19\(2\):EN-7084](#)

Notification of dried flowers of *Clitoria ternatea* L. as a traditional food from a third country under Article 14 of Regulation (EU) 2015/2283.

MRLs for tetraconazole revised

[EFSA Journal 2022;20\(1\):7111](#)

Review of the existing maximum residue levels for tetraconazole according to Article 12 of Regulation (EC) No 396/2005.

Getting sugar has no safe upper limit

[EFSA Journal 2022;20\(2\):7074](#)

Scientific Opinion; Tolerable upper intake level for dietary sugars

Modified 'four-event stack maize' safe

[EFSA Journal 2022;20\(3\):7134](#)

Assessment of genetically modified maize DP4114 × MON 810 × MIR604 × NK603 and subcombinations, for food and feed uses, under Regulation (EC) No 1829/2003 (application EFSA-GMO-NL-2018-150).

Xuta seed grains not assessed as safe by EFSA

[EFSA Journal 2022;19\(3\):EN-7197](#)

Technical Report on the notification of xuta (edible variety of *Jatropha curcas* L.) roasted and ground seed kernels as a traditional food from a third country pursuant to Article 14 of Regulation (EU) 2015/2283.

Italian hazelnut amended in specification

[EU Official Journal L 106 of 5 April 2022, p. 3](#)

Commission Implementing Regulation (EU) 2022/536 of 29 March 2022 approving a non-minor amendment to the specification of a name entered in the register of protected designations of origin and protected geographical indications ('Nocciola Romana' (PDO)).

Permits granted for marketing GMO rapeseed and soybean

[Public Gazette L 105 of 4 April 2022, p. 39](#)

Commission Implementing Decision (EU) 2022/529 of 31 March 2022 authorising the placing on the market of products containing, consisting of, or produced from genetically modified oilseed rape 73496 (DP-Ø73496-4) pursuant to Regulation (EC) No 1829/2003 of the European Parliament and of the Council

[EU Official Journal L 105 of 4 April 2022, p. 51](#)

Commission Implementing Decision (EU) 2022/531 of 31 March 2022 authorising the placing on the market of products containing, consisting of, or produced from genetically modified soybean GMB151 (BCS-GM151-6) pursuant to Regulation (EC) No 1829/2003 of the European Parliament and of the Council.

Alternaria toxins in fruits, tomatoes and cereals cause EFSA concern

[EU Official Journal L 107 of 6 April 2022, p. 90](#)

Commission Recommendation (EU) 2022/553 of 5 April 2022 on monitoring the presence of Alternaria toxins in foodstuffs.

Control of glycoalkaloids in potatoes approved

[EU Official Journal L 108 of 7 April 2022, p. 66](#)

Commission Recommendation (EU) 2022/561 of 6 April 2022 on monitoring for the presence of glycoalkaloids in potatoes and potato derivatives.

MRL of flutianil on US fruit and vegetables increased

[EU Official Journal L 109 of 8 April 2022, p. 35](#)

Commission Regulation (EU) 2022/566 of 7 April 2022 amending Annex II to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for flutianil in or on certain products

Application for modification of MRLs for sulfoxaflora

[EFSA Journal 2022;20\(4\):7283](#)

Modification of the existing maximum residue levels for sulfoxaflor in various crops.

Pectin lyase and endo-polygalacturonase approved for use in production process fruit and vegetable juices

[EFSA Journal 2022;20\(5\):7235](#)

Safety evaluation of the food enzyme pectin lyase from the genetically modified *Aspergillus luchuensis* strain FLOSC.

[EFSA Journal 2022;20\(4\):7236](#)

Safety evaluation of the food enzyme endo-polygalacturonase from the genetically modified *Aspergillus luchuensis* strain FLYSC.

Note from tropical tree species *Canarium ovatum* (the pili) probably safe

[EFSA Journal 2022;19\(5\):EN-7314](#)

Technical Report on the notification of nuts of *Canarium ovatum* Engl. as a traditional food from a third country pursuant to Article 14 of Regulation (EU) 2015/2283.

Update on Salmonella outbreak in chocolate products from Belgian factory

[EFSA Journal 2022;19\(5\):EN-7352](#)

Multi-country outbreak of monophasic *Salmonella* Typhimurium sequence type 34 linked to chocolate products

Permits GMO corn and soybean for Pioneer Overseas Corporation approved

[Public Gazette L 141 of 20 May 2022, p. 123](#)

Commission Implementing Decision (EU) 2022/798 of 19 May 2022 authorising the placing on the market of products containing, consisting of, or produced from genetically modified soya MON 87769 × MON 89788 pursuant to Regulation (EC) No 1829/2003 of the European Parliament and of the Council

EFSA assessed GM soya as safe

[EFSA Journal 2022;20\(6\):7340](#)

Assessment of genetically modified soybean A5547-127 for renewal authorisation under Regulation (EC) No 1829/2003 (application EFSA-GMO-RX-020).

Genetically modified maize DP4114 × MON 810 × MIR604 × NK603 authorised

[EU Official Journal L 176 of 1 July 2022, p. 26](#)

Commission Implementing Decision (EU) 2022/1094 of 29 June 2022 authorising the placing on the market of products containing, consisting of, or produced from genetically modified maize DP4114 × MON 810 × MIR604 × NK603 and genetically modified maize resulting from the combination of two or three of the individual transformation steps DP4114, MON 810, MIR604 and NK603, in accordance with Regulation (EC) No 1829/2003 of the European Parliament and of

Rapeseed MON 94100 as safe as conventional counterpart

[EFSA Journal 2022;20\(7\):7411](#)

Assessment of genetically modified oilseed rape MON 94100 for food and feed uses, under regulation (EC) No 1829/2003 (application EFSA-GMO-NL-2020-169).

Import tolerances will apply to residues of fludioxonil on sugar beet and bananas from today

[EU Official Journal L 192 of 21 July 2022, p. 1](#)

Commission Regulation (EU) 2022/1264 of 20 July 2022 amending Annex II to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for fludioxonil in or on certain products.

Maximum levels of phosmet reviewed by EFSA

[EFSA Journal 2022;20\(7\):7448](#)

Review of the existing maximum residue levels for phosmet according to Article 12 of Regulation (EC) No 396/2005.

Yarrow in the list of herbal substances

[EU Official Journal L 198 of 27 July 2022, p. 22](#)

Commission Implementing Decision (EU) 2022/1316 of 25 July 2022 amending Decision 2008/911/EC establishing a list of herbal substances, preparations and combinations thereof for use in traditional herbal medicinal products.

Maximum levels for hydrogen cyanide and ochratoxin A amended

[EU Official Journal L 205 of 5 August 2022, p. 227](#)

Commission Regulation (EU) 2022/1364 of 4 August 2022 amending Regulation (EC) No 1881/2006 as regards maximum levels for hydrogen cyanide in certain foods.

[EU Official Journal L 206 of 8 August 2022, p. 11](#)

Commission Regulation (EU) 2022/1370 of 5 August 2022 amending Regulation (EC) 1881/2006 as regards maximum levels for ochratoxin A in certain foodstuffs.

Acute reference dose Δ9-THC exceeded

[EU Official Journal L 211 of 12 August 2022, p. 83](#)

Commission Regulation (EU) 2022/1393 of 11 August 2022 amending Regulation (EC) 1881/2006 as regards the maximum levels of delta-9-tetrahydrocannabinol (Δ9-THC) in hemp seeds and derived products.

Nutritional enzyme endo-1,4-β-mannosidase found safe

[EFSA Journal 2022;20\(8\):7478](#)

Safety evaluation of the food enzyme mannan endo-1,4- β -mannosidase from the genetically modified *Trichoderma reesei* strain RF6232.

Protected geographical indication for Finocchio di Isola Capo Rizzuto (Italian fennel)

[EU Official Journal L 218 of 23 August 2022, p. 1](#)

Commission Implementing Regulation (EU) 2022/1416 of 16 August 2022 entering a name in the register of protected designations of origin and protected geographical indications ('Finocchio di Isola Capo Rizzuto' (PGI)).

Alubia de Anguiano Spanish bean entered in the PDO register

[EU Official Journal L 220 of 25 August 2022, p. 1](#)

Commission Implementing Regulation (EU) 2022/1425 of 18 August 2022 entering a name in the register of protected designations of origin and protected geographical indications 'Alubia de Anguiano' (PDO).

Nagykörűi ropogós cseresznye (Hungarian cherry) listed PGI register

[EU Official Journal L 221 of 26 August 2022, p. 65](#)

Commission Implementing Regulation (EU) 2022/1427 of 19 August 2022 entering a name in the register of protected designations of origin and protected geographical indications ('Nagykörűi ropogós cseresznye' (PGI)).

New limit for cyprodinil in soybeans and no MRL for Calcium carbonate, carbon dioxide and potassium hydrogen carbonate

[EU Official Journal L 224 of 30 August 2022, p. 1](#)

Commission Regulation (EU) 2022/1435 of 26 August 2022 amending Annexes II and IV to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for calcium carbonate, carbon dioxide, cyprodinil and potassium hydrogen carbonate in or on certain products.

EFSA found GMO maize MIR162 safe

[EFSA Journal 2022;20\(9\):7562](#)

Assessment of genetically modified maize MIR162 for renewal authorisation under Regulation (EC) No 1829/2003 (application EFSA-GMO-RX-025).

Watercress approved as a guaranteed traditional speciality

[EU Official Journal L 274 of 24 October 2022, p. 14](#)

Commission Implementing Regulation (EU) 2022/2000 of 18 October 2022 entering a name in the register of traditional specialities guaranteed 'Watercress'/'Cresson de Fontaine'/'Berros de Agua'/'Agrião de Água'/'Watercress'/'Brunnenkresse' (TSG).

Marketing standards for olive oil tightened

[EU Official Journal L 284 of 4 November 2022, p. 1](#)

Commission Delegated Regulation (EU) 2022/2104 of 29 July 2022 supplementing Regulation (EU) No 1308/2013 of the European Parliament and of the Council as regards marketing standards for olive

oil and repealing Commission Regulation (EEC) No 2568/91 and Commission Implementing Regulation (EU) No 29/2012.

GMO rapeseed and maize as safe as conventional counterpart

[EFSA Journal 2022;20\(11\):7590](#)

Assessment of genetically modified oilseed rape GT73 for placing on the market of isolated seed protein for food under Regulation (EC) No 1829/2003 (application EFSA-GMO-RX-026/2).

[EFSA Journal 2022;20\(11\):7619](#)

Assessment of genetically modified maize DP4114 × MON 89034 × MON 87411 × DAS-40278-9 and subcombinations, for food and feed uses, under Regulation (EC) No 1829/2003 (application EFSA GMO-NL-2020-171).

Assessment GMO maize MON 95379

[EFSA Journal 2022;20\(11\):7588](#)

Assessment of genetically modified maize MON 95379 for food and feed uses, under Regulation (EC) No 1829/2003 (application EFSA-GMO-NL-2020-170).

Import of dried Kanari nuts as traditional food approved

[EFSA Journal 2022;19\(11\):EN-7640](#)

Technical Report on the notification of dried nuts of *Canarium amboinense* Hochr. as a traditional food from a third country pursuant to Article 14 of Regulation (EU) 2015/2283.

Genetically modified maize MON 87429 found safe

[EFSA Journal 2022;20\(11\):7589](#)

Assessment of genetically modified Maize MON 87429 for food and feed uses, under Regulation (EC) No 1829/2003 (application EFSA-GMO-NL-2019-161).

MRLs for haloxyfop-P have been revised

[EFSA Journal 2022;20\(11\):7658](#)

Targeted review of maximum residues levels (MRLs) for haloxyfop-P.

Further research on the safety of green tea extracts in relation to liver damage

[EU Official Journal L 310 of 1 December 2022, p. 7](#)

Commission Regulation (EU) 2022/2340 of 30 November 2022 amending Annex III to Regulation (EC) No 1925/2006 of the European Parliament and of the Council as regards green tea extracts containing (-)-epigallocatechin-3-gallate.

GMO soya varieties MON 87701, MON 87701 × MON 89788 and 40-3-2 approved

[EFSA Journal 2022;20\(12\):7683](#)

Assessment of genetically modified soybean MON 87701 for renewal authorisation under Regulation (EC) No 1829/2003 (application EFSA-GMO-RX-021).

[EFSA Journal 2022;20\(12\):7684](#)

Assessment of genetically modified soybean MON 87701 × MON 89788 for renewal authorisation under Regulation (EC) No 1829/2003 (application EFSA-GMO-RX-022).

[EFSA Journal 2022;20\(12\):7685](#)

Assessment of genetically modified soybean 40-3-2 for renewal authorisation under Regulation (EC) No 1829/2003 (application EFSA-GMO-RX-023).

Olive oil fraud in France

The Directorate General for Competition, Consumer Affairs and Fraud Prevention (DGCCRF) published the 2020 survey on olive oil quality. DGCCRF carried out 206 inspections at 177 establishments, analyzing in total 97 samples. More than a third of the establishments checked had anomalies, mostly concerning the absence or inadequacy of labeling information, substitution of olive oil with other vegetable oils, or wrong geographical origins. Almost half of the 97 samples taken were non-compliant in terms of organoleptic characteristics.

Extra virgin olive oil samples failed to meet the required standards

Researchers from China and Spain examined the quality of extra-virgin olive oil (EVOO) imported into China from Spain, Greece, Italy, Turkey, Tunisia, and Australia. Almost 72% of the 85 samples failed to reach the required quality requirements, with aging, oxidation, and counterfeiting with refined oils being the main issues. Specifically:

- 47% not conforming to the standards for commercial EVOO
- 3.5% bearing wrong geographical origin
- 6% adulterated with other refined oils

Vanilla is not always vanilla

In 2019, the Direction générale de la concurrence, de la consommation et de la répression des fraudes (DGCCRF) carried out a survey targeting vanilla-based products. 25% of the 177 establishments inspected did not comply with the related legislation. In addition, 25% of vanilla pods, 50% of vanilla extracts or flavors, and 33% of vanilla sugars were not compliant as well. Typical frauds include: replacing vanilla products with lower-quality ones; intensifying taste/smell/appearance; reproducing the vanilla flavor with synthetic vanillin; adding caramel to standardize the color.
